About W.A.R. Guardians...

Bullying is a global epidemic that is just as bad as disease, addiction, drunk driving deaths; it is one of the leading causes of teen suicides. Understanding the types of bullying and educating our communities, our schools, our work force and continuing to build a team of **W.A.R. Guardians** to combat this through education and rehabilitation, is the only way to stop the suicide rates from rising.

Being the Voice for those who don't have one will be the key to taking back our schools, our community, and ultimately our world from this plague.
